**67403**

67403 LGB-Patent-Kugellagerradsätze

aus Metall, in denen jedes Rad einzeln in einem Kugellager läuft. Mit Kontaktzapfen und Stecker für Lichtanschluß. Sehr geringer Rollwiderstand, der das Fahren langer beleuchteter Züge erlaubt. Nachrüstung von Innenbeleuchtungen nun noch leichter ausführbar.

67403  
LGB Patented

**Ball Bearing Wheel Sets**

Ball bearings in each wheel decrease wheel friction and increase pulling capacity. Perfect for heavy rolling stock and long trains. Include integral electrical contacts and connections for easy lighting hook-ups. Fit most LGB rolling stock.

67403 Paire d'essieux métalliques à roulement à billes (patente LGB).

Par les goupilles de contact et des fiches, ces essieux assurent la prise de courant pour l'éclairage. Leur très faible résistance au roulement permet de faire circuler de longs convois éclairés. Ce dispositif simplifie aussi l'installation ultérieure de l'éclairage.
